

Compost Tea Catalyst™

Growing Solutions Compost Tea Catalyst is a unique blend of ingredients formulated to stimulate diverse microbial growth during aerated compost tea production. In addition to seaweed extract, humic acid and mineral powder, our Catalyst contains an array of select botanical ingredients without the use of simple sugars.

A key feature of our formulation is the Catalyst Booster that is added near the end of the compost tea production cycle. The Catalyst Booster contains additional ingredients selected to sustain microbial activity during compost tea application.

Compost Tea Catalyst is listed by the Organic Materials Review Institute (OMRI) for use in organic production, and the majority of ingredients are certified organic.

Features

- Formulated to enhance microbial growth and diversity
- OMRI listed for use in organic production
- Easy-to-use powder
- Ideal for use in any compost tea system
- Available in four convenient sizes
